

# Regional Mathematical Olympiad-2015

Time: 3 hours

December 06, 2015

## Instructions:

- Calculators (in any form) and protractors are not allowed.
- Rulers and compasses are allowed.
- Answer all the questions.
- All questions carry equal marks. Maximum marks: 102.
- Answer to each question should start on a new page. Clearly indicate the question number.

1. Let  $ABC$  be a triangle. Let  $B'$  denote the reflection of  $B$  in the internal angle bisector  $\ell$  of  $\angle A$ . Show that the circumcentre of the triangle  $CB'I$  lies on the line  $\ell$ , where  $I$  is the incentre of  $ABC$ .
2. Let  $P(x) = x^2 + ax + b$  be a quadratic polynomial where  $a$  is real and  $b$  is rational. Suppose  $P(0)^2, P(1)^2, P(2)^2$  are integers. Prove that  $a$  and  $b$  are integers.
3. Find all integers  $a, b, c$  such that

$$a^2 = bc + 4, \quad b^2 = ca + 4.$$

4. Suppose 40 objects are placed along a circle at equal distances. In how many ways can 3 objects be chosen from among them so that no two of the three chosen objects are adjacent nor diametrically opposite?
5. Two circles  $\Gamma$  and  $\Sigma$  intersect at two distinct points  $A$  and  $B$ . A line through  $B$  intersects  $\Gamma$  and  $\Sigma$  again at  $C$  and  $D$ , respectively. Suppose that  $CA = CD$ . Show that the centre of  $\Sigma$  lies on  $\Gamma$ .
6. How many integers  $m$  satisfy both the following properties:  
(i)  $1 \leq m \leq 5000$ ; (ii)  $[\sqrt{m}] = [\sqrt{m+125}]$ ?  
(Here  $[x]$  denotes the largest integer not exceeding  $x$ , for any real number  $x$ .)
